Office Action Summary	Application No. 10/597,250	Applicant(s) SHIKANO ET AL.	
	Examiner TUAN HO	Art Unit 2622	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2622

1. Applicant's election with traverse of the invention of Group I, claims 1-9 in the reply filed on 10/16/09 is acknowledged. Therefore, claim 10 is withdrawn from further consideration on the merits as non-elected claim. The traversal is on the ground(s) that the invention of Species A and B are still part of the single general inventive concept of providing image pickup including determining and manipulating optical magnification data. This is not found persuasive because the invention of Group I and II include different technical features and operations as discussed in the last Office action.

The requirement is still deemed proper and is therefore made FINAL.

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1 (Figure 1) and Species 2 (Figure 2)

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species,

Art Unit: 2622

including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 1-6 read on the species of Fig. 1 and claim 7-9 read on the species of Fig. 2.

The following claim(s) are generic: no claim appears to be generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the image pickup apparatus in Fig. 1 does not include a zoom ring that is used to change the magnification of an object image and the image pickup apparatus of Fig. 2 includes zoom ring and a display is capable of display magnification nominal magnification corresponding to the scale marking value N indicated on the zoom indicator.
